MATTHEW POOL

Software Engineer | Product Designer

UI/UX | Native Mobile | Full-Stack Web | AI/ML | B2B/B2C

mathyou.me@gmail.com 903-576-0223 Winnsboro, TX

matthew-pool.github.io

PROFESSIONAL SUMMARY

I graduated Summa Cum Laude with a 3.99 GPA in Computer Science — backed by over a decade of combined customer service and technical support experience, plus five years as a top-ranked outbound B2B/B2C sales representative for Fortune 500 clients. This unique blend allows me to bridge the gap between user experience and technical implementation — managing the end-to-end product lifecycle from design to production deployment to build robust, scalable solutions that provide high ROI.

EDUCATION

Bachelor of Science in Computer Science

Southern New Hampshire University | Sep 2021 – Dec 2024

Summa Cum Laude • ***3.99 GPA*** • **President's List**

Certificate in Data Analysis • *uCertify (2024)*

Associate of Arts in General Studies

Tyler Junior College | Aug 2003 – May 2005

TECHNICAL SKILLS

🎨 Product Design

UI/UX Design, Figma, Inkscape, GIMP, Adobe Creative Suite, CAD, SketchUp, Responsive Design, Motion Design, UI Animation, User Flows, Information Architecture

💻 Programming Languages

Python, JavaScript, TypeScript, Kotlin, Java, C/C++, C#, SQL

📱 Mobile Development

Android SDK, Jetpack Compose, Material Design 3, MVVM Architecture, Coroutines, Hilt, Firebase, REST APIs

🌐 Frontend Web

React, Angular, RxJS, HTML5, CSS, SVG Animation, Vite, Bootstrap, Tailwind CSS

🗄️ Backend & Databases

Node.js, Express.js, Spring Boot, MySQL, MongoDB, Mongoose (ODM), AWS DynamoDB, Firebase Firestore

🤖 Data Science & Machine Learning

Keras (TensorFlow), scikit-learn, Pandas, NumPy, Matplotlib, DNN, CNN, Reinforcement Learning (RL), Deep Q-Networks (DQN)

🎮 Gaming & Graphics

Unity, OpenGL/GLSL, 2D/3D Graphics, Story-telling, Game Design & Development

🧪 Testing & QA

Postman, pytest, JUnit, MockK, Mockito, Espresso, Robolectric, Jacoco, Jest, Selenium

⚙️ Infrastructure & Security

Docker/Docker Compose, AWS, CI/CD, Git/GitHub Actions, JWT, OWASP, Snyk, Gradle, Maven

TECHNICAL PROJECTS

Flick (Android)	*Kotlin, Jetpack Compose, MVVM, Hilt, Firebase, GitHub Actions*	Leveraged the Archive.org API to build a highly scalable, zero-infrastructure-cost video library. Paired this with a proprietary ML recommendation engine and asynchronous caching/preloading to deliver a low-latency, real-time streaming experience.
Wormhole	*Python, OOP, State Management*	Architected a complex interactive Python terminal game utilizing advanced object-oriented programming, dynamic state management, and robust game loop logic.
Full-Stack Travel Platform	*Angular, TypeScript, Docker, AWS DynamoDB*	Engineered an Angular SPA with a Dockerized backend, orchestrating a full DB migration from MongoDB to AWS.
The Existence Paradox	*React, TypeScript, Tailwind CSS*	Interactive web application featuring dynamic state management and a complex decision-tree navigation system.
Financial Security Audit	*Java, Spring Boot, OWASP, AES-256*	Refactored a legacy REST API to implement encryption at rest, mitigating injection vulnerabilities to achieve OWASP compliance.
Machine Learning Models	*Python, Keras (TensorFlow), scikit-learn, NumPy*	Trained and tuned a CNN for image classification and a Deep Q-Network (DQN) for reinforcement learning pathfinding.
Product Design & UX	*Figma, Wireframes, Prototyping*	End-to-end UX design for mobile and web apps: personas, wireframes, hi-fidelity interactive prototypes.
Professional Portfolio	*HTML5, CSS3, Vanilla JS*	Designed and hand-coded a zero-dependency responsive portfolio featuring a custom dark mode and complex SVG animations.

PROFESSIONAL EXPERIENCE

Lead Software Engineer & Product Designer

Jan 2025 – Present

AppBuddy (Independent Venture)

- **Mobile Product Strategy:** Architected and launched **Flick**, a native Android video streaming platform — designed in Figma, built in Kotlin (MVVM), and deployed to Google Play with a proprietary ML recommendation engine.
- **Backend & Logic Engineering:** Architected **Wormhole**, a Python-based application, utilizing advanced object-oriented programming (OOP), state management, and complex logic design.
- **Web & Frontend Architecture:** Engineered a zero-dependency personal portfolio platform utilizing pure HTML/CSS/JS, and built **Existence Paradox**, a React/TypeScript application featuring dynamic state management and complex decision-tree routing.
- **Development Velocity & Prototyping:** Leveraged generative AI toolchains to accelerate end-to-end development —rapidly iterating on high-fidelity UI assets, generating boilerplate code, and scaling solo output across all applications.
- **CI/CD & QA:** Built robust CI/CD pipelines via GitHub Actions automating unit (JUnit/MockK) and UI tests (Espresso) to ensure stable production deployments.

Outbound Sales & Account Management (2004–2009) ⭐ Recurring Top Performer

Sales Representative • T.C.I.M. Services (B2B/B2C Outbound Sales)

- Conducted high-volume outbound sales calls and account management on behalf of Fortune 500 clients including American Express, AT&T, QVC, Citibank, Blue Cross Blue Shield, among others.
- Consistently ranked among the top performers in a rolling pool of 100+ representatives, exceeding KPIs across acquisition, upsell, and retention metrics.
- Developed call scripts adopted across the team and actively trained junior sales representatives on objection handling and closing techniques.

Technical Support, IT Operations & Inbound Sales (2011–2013)

Technical Support Specialist & Desktop Support • Sutherland | New Electronics Warranty | TeleNetwork

- Diagnosed and resolved complex hardware, software, VoIP, and ISP issues via remote desktop tools; documented resolutions in CRM knowledge bases to improve team efficiency.
- Translated complex technical issues into clear guidance for diverse consumer audiences.
- Identified upsell and upgrade opportunities during support interactions, consistently meeting or exceeding inbound sales and satisfaction targets.
- Clients included Frontier Communications and DirecTV premium support customers.

Shift Management & Customer Service (1997–2003 / 2009–2010) 👔 Management & Ops

Shift Manager & Retail Associate • Kmart / Fast Food & Customer Service (East TX)

- Directed workflow, delegated tasks, and trained new hires across fast-paced retail and food service environments.
- Regularly trusted to close stores independently at night, maintaining full financial accountability for cash registers and daily deposits.
- Managed inventory, restocking, and merchandising to optimize sales floor presentation.
- Operated cash registers and promoted store membership programs at store entrance.

Independent Projects & Family Leave (2014–2021)

Construction & Primary Caregiver

- Developed woodworking skills while working at Diamond G Cedar (family-owned business) and doing independent research online.
- Applied project management skills to successfully design and construct a 3-bedroom residential home from an existing woodshed, minimizing project costs under strict budgetary and labor constraints by carefully salvaging and cleaning raw materials — one nail at a time.
- Served as caregiver for a family of four and helped facilitate spouse's successful return to college to receive her BBA in Finance, prior to returning to college myself to earn my Computer Science degree.
