MATTHEW POOL

Software Engineer | Product Designer

UI/UX | Native Mobile | Full-Stack Web | AI/ML | B2B/B2C

mathyou.me@gmail.com 903-576-0223 Winnsboro, TX

matthew-pool.github.io

PROFESSIONAL SUMMARY

Summa Cum Laude Computer Science graduate and Software Engineer with a rare background spanning end-to-end product development, 5+ years in Fortune 500 B2B/B2C sales, and a decade of technical support. I bridge the gap between UI/UX design and technical implementation—architecting backends, designing in Figma, and shipping to production—to deliver accessible, scalable software that drives real business value and solves real user problems.

EDUCATION

Bachelor of Science in Computer Science

Southern New Hampshire University | Sep 2021 – Dec 2024

Summa Cum Laude • ***3.99 GPA*** • **President's List**

Certificate in Data Analysis • *uCertify (2024)*

Associate of Arts in General Studies

Tyler Junior College | Aug 2003 – May 2005

TECHNICAL SKILLS

🎨 Product Design

UI/UX Design, Figma, Inkscape, GIMP, Adobe Creative Suite, CAD, SketchUp, Responsive Design, Motion Design, UI Animation, User Flows, Information Architecture

💻 Programming Languages

Python, JavaScript, TypeScript, Kotlin, Java, C/C++, C#, SQL

📱 Mobile Development

Android SDK, Jetpack Compose, Material Design 3, MVVM Architecture, Coroutines, Hilt, Firebase, REST APIs

🌐 Web Technologies

React, Angular, Node.js, Express.js, RxJS, HTML5, CSS, SVG Animation, Vite, Bootstrap, Tailwind CSS, Spring Boot

🗄️ Databases

MySQL, MongoDB, Mongoose (ODM), AWS DynamoDB, Firebase Firestore

🤖 Data Science & Machine Learning

Keras (TensorFlow), scikit-learn, Pandas, NumPy, Matplotlib, DNN, CNN, Reinforcement Learning (RL), Deep Q-Networks (DQN)

🧪 Testing & QA

Postman, pytest, JUnit, MockK, Mockito, Espresso, RoboElectric, Jacoco, Jest, Selenium

⚙️ DevOps & Security

Docker/Docker Compose, AWS, CI/CD, Git/GitHub Actions, JWT, OWASP, Snyk, Gradle, Maven

TECHNICAL PROJECTS

Flick (Android)	*Kotlin, Jetpack Compose, MVVM, Hilt, Firebase, GitHub Actions*	Proprietary ML recommendation engine, dual-axis gesture navigation, asynchronous preloading and caching for a perceived real-time streaming experience, and a CI/CD pipeline via GitHub Actions.
Wormhole	*Python, OOP, State Management*	Architected a complex interactive Python terminal game utilizing advanced object-oriented programming, dynamic state management, and robust game loop logic.
Full-Stack Travel Platform	*Angular, TypeScript, Docker, AWS DynamoDB*	Engineered an Angular SPA with a Dockerized backend, orchestrating a full DB migration from MongoDB to AWS.
The Existence Paradox	*React, TypeScript, Tailwind CSS*	Interactive web application featuring dynamic state management and a complex decision-tree navigation system.
Financial Security Audit	*Java, Spring Boot, OWASP, AES-256*	Refactored a legacy REST API to implement encryption at rest, mitigating injection vulnerabilities to achieve OWASP compliance.
Machine Learning Models	*Python, Keras (TensorFlow), scikit-learn, NumPy*	Trained and tuned a CNN for image classification and a Deep Q-Network (DQN) for reinforcement learning pathfinding.
Product Design & UX	*Figma, Wireframes, Prototyping*	End-to-end UX design for mobile and web apps: personas, wireframes, hi-fidelity interactive prototypes.
Professional Portfolio	*HTML5, CSS3, Vanilla JS, GitHub Actions*	Designed and hand-coded a zero-dependency responsive portfolio featuring a custom dark mode, complex SVG animations, and an automated CI/CD pipeline.

PROFESSIONAL EXPERIENCE

Lead Software Engineer & Product Designer

Jan 2025 – Present

AppBuddy (Independent Venture)

- **Mobile Product Strategy:** Architected and launched **Flick**, a native Android video streaming platform—designed in Figma, built in Kotlin (MVVM), and deployed to Google Play with a proprietary ML recommendation engine.
- **Backend & Logic Engineering:** Architected **Wormhole**, a Python-based application, utilizing advanced object-oriented programming (OOP), state management, and complex logic design.
- **Web & Frontend Architecture:** Engineered a zero-dependency personal portfolio platform utilizing pure HTML/CSS/JS, and built **Existence Paradox**, a React/TypeScript application featuring dynamic state management and complex decision-tree routing.
- **DevOps & QA:** Built robust CI/CD pipelines via GitHub Actions automating unit (JUnit/MockK) and UI tests (Espresso) to ensure stable production deployments.

Outbound Sales & Account Management (2004–2009) ⭐ Recurring Top Performer

Sales Representative • T.C.I.M. Services (B2B/B2C Outbound Sales)

- Conducted high-volume outbound sales calls and account management on behalf of Fortune 500 clients including American Express, AT&T, QVC, Citibank, Blue Cross Blue Shield, among others.
- Consistently ranked among the top performers in a rolling pool of 100+ representatives, exceeding KPIs across acquisition, upsell, and retention metrics.
- Developed call scripts adopted across the team and actively trained junior sales representatives on objection handling and closing techniques.

Technical Support, IT Operations & Inbound Sales (2011–2013)

Technical Support Specialist & Desktop Support • Sutherland | New Electronics Warranty | TeleNetwork

- Diagnosed and resolved complex hardware, software, VoIP, and ISP issues via remote desktop tools; documented resolutions in CRM knowledge bases to improve team efficiency.
- Translated complex technical issues into clear guidance for diverse consumer audiences.
- Identified upsell and upgrade opportunities during support interactions, consistently meeting or exceeding inbound sales and satisfaction targets.
- Clients included Frontier Communications and DirecTV premium support customers.

Shift Management & Customer Service (1997–2003 / 2009–2010) Management & Ops

Shift Manager & Retail Associate • Kmart / Fast Food & Customer Service (East TX)

- Directed workflow, delegated tasks, and trained new hires across fast-paced retail and food service environments.
- Regularly trusted to close stores independently at night, maintaining full financial accountability for cash registers and daily deposits.
- Managed inventory, restocking, and merchandising to optimize sales floor presentation.
- Operated cash registers and promoted store membership programs at store entrance.

Independent Projects & Family Leave (2014–2021)

Construction & Primary Caregiver

- Designed, constructed, and converted a small woodshed intoa 3-bedroom residential structure - all from raw materials, independently managing resource allocation and electrical, plumbing, and finish work.
- Served as primary caregiver for a family of four while facilitating spouse's successful return to college.
