PROFESSIONAL SUMMARY

Software Engineer managing the complete product lifecycle — from Figma wireframes and high-fidelity prototypes to production-ready native Android apps, full-stack web applications, and Python-powered backends. Committed to WCAG 2.2 AA accessibility, clean architecture patterns (MVVM), and test-driven development. Leverages nearly a decade of combined experience across technical support, customer service, and B2B/B2C sales to provide a user-empathy and communication advantage rarely found in pure engineers.

EDUCATION

Bachelor of Science in Computer Science

Southern New Hampshire University
Sept 2021 – Jan 2025

🏆 **Summa Cum Laude**
3.99 GPA • President's List

Associate of Arts

Tyler Junior College
General Studies, IT Focus

TOOLS & TECHNOLOGIES

📄 Languages

Python, JavaScript, TypeScript, Kotlin, Java, C/C++, C#, SQL

🎨 Frontend & UI Design

React, HTML5, CSS3, Tailwind CSS, Vite, Angular, Figma, SVG Animation, WCAG 2.2 AA Accessibility

📱 Mobile Development

Android SDK, Jetpack Compose, Material Design 3, MVVM Architecture, Hilt, ExoPlayer, Firebase

🖥 Backend & Databases

Node.js, Spring Boot, MySQL, MongoDB, AWS DynamoDB, REST APIs, ERD Database Design

⚙ Infrastructure, QA & Methodology

Git/GitHub Actions, Docker, CI/CD, Agile/Scrum, UML/Systems Design, JUnit, Espresso, MockK, Postman

PROFESSIONAL EXPERIENCE

Software Engineer & Founder

App.Buddy (Independent Venture) | DESIGN • DEVELOP • DEPLOY

Jan 2025 - Present

- Engineering & CI/CD (DevOps):** Established automated testing and deployment pipelines (GitHub Actions, JUnit, Espresso, MockK), identifying logic bugs and leveraging GenAI to accelerate development cycles across projects.

Software Development Lifecycle (SDLC)

	Flick (Android) FEATURED	Kotlin, Compose, MVVM, Archive.org API, Firebase, AI/ML	Engineered an Android app integrated with a custom machine learning recommendation engine. Diagnosed production issues and ensured stable deployment environments.
	Wormhole FEATURED	Python, OOP, Multithreading, ANSI	Terminal sci-fi adventure with a custom game engine, event-driven state management, dynamic ANSI rendering, and a real-time interactive map via multithreaded async UI updates.
	The Existence Paradox	React, TypeScript, Tailwind, Vite	Interactive philosophical SPA with decision-tree navigation, complex state hooks, and a WCAG 2.2 AA dark-theme UI featuring fluid typography and programmatic smooth scrolling.

ADDITIONAL PROJECTS

	Super Mario Maker Level Design	Game Design, Analytics, User Psychology	Top 0.003% global creator (Rank #39/1.3M+) under the alias CheezSauce. Designed levels achieving 133k+ stars via iterative feedback and metrics.
	Legacy System Refactoring	Java, JUnit 5, Maven, MapDB	Modernized a legacy Java CLI application by integrating a Maven build pipeline, achieving robust JUnit test coverage, and optimizing data retrieval time complexity from O(n) to O(1).
	Full-Stack Travel Platform	MEAN Stack, AWS DynamoDB, Docker	Dual-interface web app featuring a cloud-secured admin SPA, RESTful APIs, and migration to AWS DynamoDB via containerized Docker environments.
	Systems Analysis & Design	UML, SDD, Architecture, Markdown	Authored a System Design Document (SDD) for DriverPass, a three-tier scheduling platform, mapping system architecture through UML class, use case, activity, and sequence diagrams for developer handoff.
	Frontend & Accessibility Engineering	Figma, Prototyping, Wireframing, Accessibility (WCAG)	End-to-end design process from low-fidelity wireframes to polished hi-fi mockups and developer handoff documentation. Demonstrated in Money Mobile, an accessibility-driven loan-tracking app designed for low-bandwidth embedded devices.

Additional Professional Experience

IT SUPPORT

REMOTE

TOP 1%

CRM SUPPORT

- B2B/B2C Sales (Top 1%):** Consistently ranked #1 among 100+ representatives for nearly five consecutive years in outbound sales for Fortune 500 and enterprise clients, such as AT&T, AMEX, QVC, and Blue Cross Blue Shield. Authored team call scripts, trained junior reps on objection handling and closing, and self-earned a Texas State Insurance License within one month to unlock a 35% pay increase.
- Technical Support:** Delivered remote help desk support at NEW [acquired by Asurion] for DirecTV Premium Protection Plan subscribers. Diagnosed and resolved ISP issues via remote desktop tools. Managed CRM accounts and documented resolutions for teleNetwork [now OneSupport].
