PROFESSIONAL SUMMARY

Software Engineer managing the complete product lifecycle — from Figma wireframes and high-fidelity mockups to production-ready native Android apps, full-stack web applications, and Python-powered backends. Nearly a decade of combined experience across remote technical support, face-to-face customer service, and Fortune 500 B2B/B2C sales.

EDUCATION

Bachelor of Science in Computer Science

Southern New Hampshire University
Sept 2021 – Jan 2025

Summa Cum Laude

3.99 GPA • President's List

Associate of Arts

Tyler Junior College

General Studies, IT Focus

TOOLS & TECHNOLOGIES

Languages

Python, JavaScript, TypeScript, Kotlin, Java, C/C++, C#, SQL

Frontend & UI Design

React, HTML5, CSS3, Tailwind CSS, Vite, Angular, Figma, SVG Animation, WCAG 2.2 AA Accessibility

Mobile Development

Android SDK, Jetpack Compose, Material Design 3, MVVM Architecture, Hilt, ExoPlayer, Firebase

Backend & Databases

Node.js, Spring Boot, MySQL, MongoDB, AWS DynamoDB, REST APIs, ERD Database Design

Infrastructure, QA & Methodology

Git/GitHub Actions, CI/CD, Docker, UML/Systems Design, JUnit, OWASP, Snyk, Postman

PROFESSIONAL EXPERIENCE

Software Engineer (SWE) & Founder

Jan 2025 - Present

App.Buddy | DESIGN • DEVELOP • DEPLOY

- **Engineered and deployed** scalable applications (Flick) utilizing Kotlin and modern architecture, managing complex API integrations and Firebase endpoints.
- **Investigated production issues** via log debugging and SQL queries, monitoring CI/CD pipelines (GitHub Actions) and executing QA test suites to ensure stable deployments.

App.Buddy Software Development Lifecycle (SDLC)

**Flick
(Android)**

⚡ **FEATURED**

Kotlin, Compose, MVVM, Archive.org API, Firebase, AI/ML

Engineered an Android app integrated with a custom machine learning recommendation engine. Diagnosed production issues and ensured stable deployment environments.

Wormhole

⚡ **FEATURED**

Python, OOP, Multithreading, ANSI

Terminal sci-fi adventure with event-driven state management, dynamic ANSI rendering, and real-time mapping via multithreaded async UI updates.

The Existence Paradox

React, TypeScript, Tailwind, Vite

Interactive SPA with decision-tree navigation, complex state hooks, WCAG 2.2 AA dark-theme UI, and applied laws of logic.

Super Mario Maker Level Design

Game Design, Analytics, User Psychology

Top 0.003% global creator (Rank #39/1.3M+) under the alias CheezSauce. Designed levels achieving 133k+ stars via iterative feedback and metrics.

Legacy System Refactoring

Java, JUnit 5, Maven, MapDB

Modernized a legacy Java CLI application by integrating a Maven build pipeline, achieving comprehensive JUnit test coverage, and utilizing MapDB to optimize data retrieval time complexity from $O(n)$ to $O(\log n)$ worst-case.

Full-Stack Travel Platform

MEAN Stack, AWS DynamoDB, Docker

Dual-interface web app featuring a cloud-secured admin SPA, RESTful APIs, and migration to AWS DynamoDB via containerized Docker environments.

Systems Analysis & Design

UML, SDD, Architecture, Markdown

Authored a System Design Document (SDD) for DriverPass, a three-tier scheduling platform, mapping system architecture through UML class, use case, activity, and sequence diagrams for developer handoff.

Frontend & Accessibility Engineering

Figma, Prototyping, Wireframing, Accessibility (WCAG)

End-to-end design process from low-fidelity wireframes to polished hi-fi mockups and developer handoff documentation. Demonstrated in Money Mobile, an accessibility-driven loan-tracking app designed for low-bandwidth embedded devices.

ADDITIONAL EXPERIENCE

🎧 IT SUPPORT

💻 REMOTE

★ TOP 1%

📞 CRM SUPPORT

- **B2B/B2C Sales:** Consistently ranked in the Top 1% (often #1 overall) of 100+ outbound reps at TCIM Services for enterprise clients (AT&T, AMEX, QVC, Blue Cross Blue Shield). Authored team call scripts, trained reps on objection handling, and earned a state insurance license in under a month.
- **Technical Support:** Delivered remote help desk support at NEW [acquired by Asurion] for DirecTV Premium Protection Plan subscribers. Diagnosed and resolved ISP issues via remote desktop tools. Managed CRM accounts and documented resolutions for teleNetwork [now OneSupport].
